OBJECTIVE

With almost 2 years of experience in full stack development, I am a motivated developer with a strong foundation in the MERN stack. Passionate about creating impactful, user-focused applications that integrate environmental sustainability. I have participated in global sustainability summits, bringing a unique perspective to solving challenges through innovative IT solutions.

EDUCATION

PG - Web Development, Conestoga College, Canada

December 2024

Bachelor of Computer Science Engineering, Anna University

2018 - 2022

SKILLS

Frontend Development:	HTML5, CSS3, JavaScript (ES6+), React.js, Vue.js, Next.js, Redux, Vuex Responsive Web Design, Tailwind, Bootstrap, Material-UI, Shadcn
Backend Development:	Node.js, Express.js, Python, RESTful APIs, GraphQL
Database / Cloud:	MongoDB, SQL, Firebase, DynamoDB, AWS(EC2, lambda, S3)
Design:	Adobe XD, Figma, UI/UX Designing
Tech and Services:	MVC, VITE, Git, GitHub, JIRA, Trello, Docker, Kubernetes, CI/CD, AI Prompt Engineering, Agile Management, Scrum, GeoCoding, JWT
CMS and Automation:	WordPress, Shopify, Wix, GHL, Make

EXPERIENCE

Software Developer

Feb 2025 - Present

Hafman Consulting Groups

Toronto, ON, Canada

- Develop and maintain full-stack web applications using Vue.js, and MERN Stack (MongoDB, Express.js, React.js, Node.js), ensuring high performance, scalability, and seamless user experiences.
- Customize and extend WordPress themes and plugins to meet client requirements.
- Collaborate with designers, backend developers, and stakeholders to implement scalable and responsive solutions.
- Develop and implement automated chatbots and AI agents, enhancing client interactions and overall functionality across projects.

Junior Software Developer

July 2022 - Aug 2023

Digillium Technologies

Singapore (Remote)

- Gained hands-on experience with front-end technologies such as HTML, CSS, JavaScript, Bootstrap, and React.
- Worked with back-end technologies, including Node.js, Express.js, and MongoDB, for API development and database management.
- Worked on an Employee Management System using the MERN stack, contributing to a real-world project and improving functionality.
- Enhanced design skills using Adobe XD and Figma, focusing on creating user-friendly and visually appealing interfaces.
- Contributed to team discussions, improving communication and collaboration within the development team.

Programmer Analyst Trainee

Apr 2022 - Jul 2022

Grandbiz IT Solutions

Chennai, India

- Developed responsive web pages using HTML, CSS, and JavaScript to create mobile-friendly designs.
- Worked with Bootstrap for front-end development, focusing on ensuring cross-device compatibility.

- Gained knowledge in Database Management Systems (DBMS) for managing and querying data effectively.
- Worked with senior developers to learn best practices, troubleshoot issues, and enhance coding efficiency.

START Member - TRANSECTS Network

University of Saskatchewan

Sept 2024 - Present

Saskatoon, Canada

[View Profile](#)

- Engage students and trainees in transdisciplinary learning focused on sustainability and environmental practices.
- Collaborate with professionals and academics to promote knowledge sharing and sustainability initiatives.
- Mentor emerging sustainability leaders and contribute to projects that promote environmental sustainability and social responsibility.

PROJECTS

StayLuxe. ([Try it here](#))

- Developed a luxury hotel booking application allowing users to browse and book luxury hotel rooms online.
- Built using EJS, Node.js, and MongoDB, with dynamic content rendering and efficient database management.
- Implemented RESTful APIs for handling booking data, user authentication, and hotel information.
- Integrated Mapbox for geocoding to provide location-based hotel searches and weather API for real-time weather updates at the destination.

CIBC Website clone. ([Try it here](#))

- Developed a sleek and responsive UI using Vue.js and Bootstrap, ensuring a seamless experience across all devices.
- Integrated a real-time stock market investing simulation to allow users to practice trading and track investments.
- Built an interactive loan calculator to help users estimate monthly repayments based on customizable loan parameters.
- Implemented Vue Router for smooth navigation across pages, enhancing the user experience with dynamic content loading.

AppointMe. ([Try it here](#))

- Developed an appointment booking system connecting users with service providers for streamlined scheduling.
- Utilized the MERN stack (MongoDB, Express.js, React.js, Node.js) for backend and frontend management.
- Integrated JWT authentication for secure, role-based access control, and used Axios for smooth communication between frontend and backend.
- Deployed the backend on Render and frontend on Vercel, and followed the Agile Scrum methodology, managed with Jira, to ensure continuous iteration and timely delivery.
